

Misael Kelviny da Silva

Software Engineer | Fullstack Developer

✉ misaelkelviny@gmail.com ☎ +5535992096898 📍 Minas Gerais, Brazil 🔗 LinkedIn 📁 Portfolio

PROFESSIONAL EXPERIENCE

System Analyst

CI&T

04/2026 – Present

- Built reusable components for AI agents and multi-agent workflows, enabling the consistent application of AI across different business use cases.
- Served as the focal point for evaluating AI solutions by designing testing workflows, collecting metrics, and producing reports that guided incremental improvements to internal tools used by multiple teams.
- Implemented guardrails based on frontend standards and testing patterns using Claude Code, reducing unsafe or invalid responses by 40%.
- Investigated and resolved 7 production incidents and 3 critical defects through root cause analysis and legacy-system debugging, using AI-assisted analysis to support evidence-based technical decisions.
- Developed new frontend modules within a microfrontend architecture using single-spa, React, and Vite, increasing delivery productivity by 5x through Claude and MCP integrations with Figma and Azure DevOps for development, collaboration, code reviews, and version control.

Freelancer Fullstack Developer And Technical Lead

Alpharede Website

07/2025 – 04/2026 | Pernambuco, Brazil

- Developed a high-performance "Link in Bio" platform using Next.js, Prisma, TRPC, TailwindCSS and MySQL.
- Led the dev team and managed workflows using Scrum/Kanban boards, ensuring on-time delivery.
- Resolved critical production issues in a PHP 7 URL shortener project, maintaining 99.9% uptime.
- Designed service architecture and initiated internal documentation standards to improve cross-team efficiency.
- Created complete UI/UX designs in Figma and implemented them using Nextjs, TailwindCSS, enhancing user experience and design consistency.
- Built and maintained CI/CD pipelines with GitHub Actions and Git for version control on Github, reducing deployment time by 40%.
- Set up infrastructure on VPS with Docker, Webmin for server management, and Nginx for routing and load balancing, enabling high availability.

Senior Web Developer

Globant

01/2025 – 12/2025 | São Paulo, Brazil

- Led maintenance and development of React + Vite web projects, reducing over 100 backlog bugs and consistently meeting delivery deadlines.
- Designed RESTful APIs using Spring Boot for payment and loan services, ensuring 80%+ test coverage with JUnit 5.
- Implemented Spring Batchs for parallel Services for diferent projects integrated with AWS Batch improving data analytics systems.
- Facilitated over 30 technical refinement sessions, influencing architecture decisions and reducing development cycle times.
- Acted as the primary technical contact for Product Owners and UX teams, translating business needs into technical specifications across 3 epics.
- Mentored 2 engineers, resulting in one promotion and another successfully leading independent deliveries within 6 months.
- Led daily stand-ups during Agile Master absences, achieving 100% task unblock rate and sprint goal alignment.
- Spearheaded the design of new service architectures using the C4 model and UML, enhancing technical documentation and improving onboarding processes

Software Engineer Consultant

Iteris - Software Company

02/2022 – 12/2024 | São Paulo, Brazil

- Consultant for Elopap (national banking group), developing with Next.js, React.js, JavaScript, and TypeScript.
- Refactored frontend architecture applying design patterns, Clean Code, BEMCSS, and SMACSS, improving maintainability on high-traffic pages (70,000+ monthly users).
- Applied KISS and YAGNI principles, reducing code duplication by 60%, and raised Lighthouse performance score from below 70 to over 90 points.
- Implemented SSR with Next.js on AWS, reducing rendering times by 20%, especially for image-heavy pages.
- Drove the micro-frontend architecture migration, reducing CDN costs by 30% and boosting development efficiency by 40%.
- Introduced BDD practices in refinements, cutting defects and pipeline errors, accelerating feature delivery by 30%.

PROFILE

Software Engineer with over 6 years of experience in fullstack development, and scalable system design. Proven expertise in delivering high-performance applications, driving microservice integrations, and providing technical leadership across cross-functional Agile teams. Specialist in Java, Spring Boot, React, Next.js, and AWS, with strong knowledge in Clean Architecture, Micro-frontends, and BDD practices. Consistently reduced backlog issues, optimized CI/CD pipelines, and accelerated feature delivery across multiple projects. Skilled in mentoring engineers, leading technical refinements, and acting as the bridge between business stakeholders and technical teams. Demonstrated ability to improve system reliability, performance, and developer productivity in distributed and high-demand environments.

SKILLS

Backend Development

Java | Spring Framework | Python | Nest.js | RESTful APIs | Postman | PrismaORM | TRPC | Node.js | Spring Boot | Spring Batch

DevOps & Cloud

Docker | Docker Compose | Kubernetes | AWS | Jenkins | CI/CD Pipelines | GitHub Actions

Software Architecture & Quality

Micro-frontends | Clean Architecture | Clean Code | Design Patterns | C4 Model | UML | Behavior-Driven Development (BDD) | JUnit 5 | Jest | Karate Tests

Tools & Project Management

Git | GitHub | BitBucket | Gerrit | Jira | Trello | Azure Boards | Figma | Adobe XD | Photoshop | Canva | Scrum | Agile

Frontend Development

React | Next.js | Angular | TailwindCSS | Bootstrap | SASS | HTML5 | CSS3 | JavaScript | TypeScript | Webpack | Single-SPA

EDUCATION

Master's in Strategic Management of Information Technology - Specialization in Software Engineering

Universidad Europea del Atlantico

2025 – Present | Santander, Spain

Postgraduate in Software Engineer

Faculdade Metropolitana de São Paulo

2024 – 2025 | São Paulo, Brazil

Bachelor's in Information System

University of Sapucaí Valley

2017 – 2020 | Pouso Alegre, Brazil

LANGUAGES

English

Advanced

Portuguese

Native Speaker

Spanish

Basic

- Resolved 5+ critical production incidents, ensuring 99.9% uptime and preventing customer escalations, monitoring with Datadog, Dynatrace, and Grafana.
- Used tools such as Azure Cloud, with Azure Devops for project management, as well as Azure Pipelines, Wiki, Git, and Boards for delivery tracking and control.

System Specialist II

National Institute of Telecommunications - INATEL

09/2020 – 02/2022 | Santa Rita do Sapucaí, Brazil

- Part of a multicultural team at Ericsson via a Brazilian competence center.
- Developed internal libraries and REST APIs using Java Spring Boot and Angular under Agile methodologies.
- Diagnosed and resolved over 5 critical microservice bottlenecks using JMeter, cutting incident rates by 20% and boosting system efficiency.
- Provided cross-team technical support, especially for Apache Camunda-based systems, improving incident resolution effectiveness by 20%.
- Contributed to the migration from Docker to Kubernetes, reducing CI/CD times by 25% and enhancing testing efficiency by 15%. Worked with Apache Cassandra, PostgreSQL, and OracleDB for data modeling.
- Contributed to the development and maintenance of a web application built with Angular, with TypeScript and JavaScript.
- Participated in UI/UX alignment meetings with the team to support decisionmaking and delivery planning during upstream sessions.

Quality Assurance Developer Intern

National Institute of Telecommunications - INATEL

09/2019 – 09/2020 | Santa Rita do Sapucaí, Brazil

- Applied unit and exploratory testing in software and applications, executing both manual and automated tests using Robot Framework, Sikuli, and JUnit.
- Identified and analyzed bugs, reporting issues for correction via the Jira platform.
- Implemented fixes in Android applications using Android Studio and Java, including test automation, bug reporting, and detailed documentation.
- Performed unit testing in C# within Visual Studio, integrating solutions for Universal Windows Platform (UWP) applications. Improved CI/CD pipeline performance using Jenkins on a private server, optimizing test coverage stages and enhancing delivery efficiency.
- Investigated issues in Android applications involving neural networks and machine learning, leveraging TensorFlow for model testing and validation.
